INHALANT MOSQUITO TRAP INDOOR

Model: GM910

INSTRUCTION MANUAL

PLEASE READ THIS MANUAL CAREFULLY
BEFORE USING THE APPLIANCE.
KEEP MANUAL IN A SAFE PLACE FOR EASY
REFERENCE

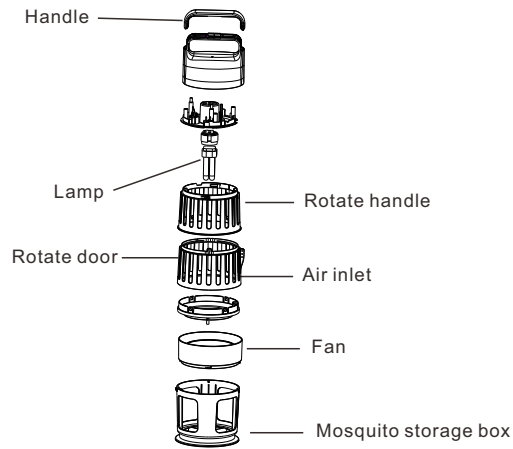

HOW IT WORKS

This Mosquito trap uses a UV Lamp, which can produce 360-400nm light to attract insects. The mosquito or insect is attracted to the light and enters the unit. The fan then sucks the mosquito/insect down into the trap when they quickly expire by a "drying out" method.

Friendly to the environment this product does not use any chemicals or pesticides, is quiet running and efficient.

STRUCTURE AND PARAMETER

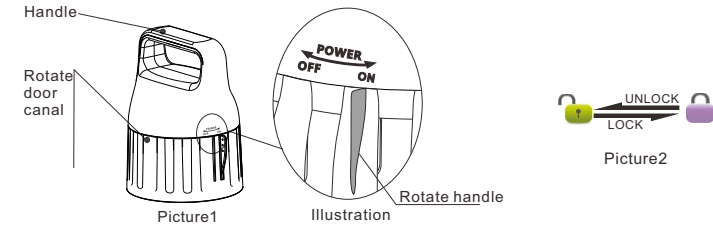

Rated voltage:220-240V~
Rated frequency:50/60Hz

Rated power:15W
Tube type:56V/7W

USE METHOD

1. Use at electricity 220-240V~ 50/60Hz, plug it directly.
2. Hold the Power switch on the side of the revolving rotation door, turn it to the "Power ON" position, when you hear "click" voice machine is turn on, Make sure the rotation door and the air inlet cancels under superposition when machine is operating.
3. Put the machine on the ground in the room up 0.8m to 1.2m, to avoid interference with other light sources.
4. For cleaning the residual body, Please hold the switch on the revolving rotation door and turn it to the POWER OFF position. After you hear the voice of "click", the machine is turn off, and then shut off the power.

5. Take the machine lightly and holding the mosquito storage box, turn to the direction with open mark (ref picture 2), when hear "click" then take off the box for storing residual of mosquitoes.
6. Throw the residual of mosquitoes away and cleaning it with brush, avoid the sundries block the box for residual of mosquitoes. Regular Cleaning is necessary in order to achieve the best function.
7. Align the slot of clean box with the slot of the machine, turn it around by the lock mark side (like in picture2), and hear the "click" voice it will be well closed.

SAFETY PRECAUTIONS

PLEASE READ THE FOLLOWING SAFETY INSTRUCTIONS CAREFULLY TO AVOID THE RISK OF ELECTRIC SHOCK, SHORT CIRCUIT, FIRE HAZARD AND DAMAGE TO THE UNIT

1. Keep out of reach of children. Children or any person with visual, mental or physical impairment should only use this unit under the supervision of an adult responsible for their safety.
2. Do not tamper, modify or attempt to repair the plug, cord or unit. Repairs should only be carried out by a qualified electrician or service technician.
3. Ensure that the unit is plugged into an electrical outlet of the correct voltage. The unit voltage is 220-240V~ 50/60Hz
4. Avoid prolonged eye contact with the light.
5. Keep away from children. Children should be closely supervised if they are in the vicinity of the appliance when it is operating.
6. Do not insert fingers or foreign objects into the appliance at any time.
7. Always disconnect from the electrical supply before emptying the insect container or cleaning the unit with a soft dry cloth.
8. Keep away from all sources of moisture. Do not operate the unit near any water source. Do not expose the unit to moisture or liquid at any time.
9. If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard.
10. This appliances not intended for use by persons (including children) with reduce physical, sensory or mental capabilities, of lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

OPERATING INSTRUCTIONS

1. Once assembled place the unit in an undercover area away from any source of moisture or water.
2. For optimum operation avoid setting up the unit near any other strong light source or draughty area.
3. Connect the plug to a suitable electrical socket.
4. Switch the unit on.

MAINTENANCE

Always disconnect the unit from the power source before cleaning or emptying the trap.

Base and outside surfaces can be wiped down with a clean, dry cloth. **Do not use wet cloths or harsh chemicals to clean the unit.**

The insect trap can be removed, emptied and washed with water. Always ensure that no moisture remains before replacing the trap and switching the unit on.
