

Barrix Rootcharger

BARRIX ROOTCHARGER is 100 % organic natural water soluble liquid Mixture of crustaceans containing bioactive Heteropolysaccharides and amino acids in the form of nanofibrils, these are the rich source of nitrogen with beta 1-4 linkages between the saccharides, These whiskers nourishes the roots and promotes the root growth. The seeds and the plants responds to the bioactive actyl amines through CERK1 (chitin elicitor receptor kinase) and CEBP (chitin elicitor-binding protein) thereby regulates the immunizations at gene level inside the plant and root naturally.

Improves root growth.

Improves protein synthesis.

Improves germination of pollen grains & tubes.

Supports in regulation of nutrients for growth of roots.

Application in different stages of plant growth:

Seed stage

Vegetative stage

Flowering stage

Fruiting to Harvesting stage

Foliar Spray

 Pass through Drip

| | Seed stage | Vegetative stage | Flowering stage | Fruiting to Harvesting stage | Dosage |
